So what is your poison?

*The objective of this presentation is to be an interactive discussion.
 No right or wrong answers, let's all benefit from each other's anecdotal experiences.
 We regularly use combination chemical treatments for different conditions,
 often disregarding the manufacturer's instructions to achieve success*

*We all have our favourite "Sussan" mixtures (this goes with that)
 Please bring them with you...what have you found that works ?*

*Using a series of case studies, we will discuss the chemical embalming remedies
 that could be utilised. In the room there will be literally hundreds of years of combined
 embalming experience, lets utilise it. Let the students benefit from your experience.*
